SUMMARY

Third-year Computer Science Engineering student aiming for a career in ML and AI, with hands-on AI/ML internship experience, 16 completed certifications across AWS, Google Cloud, and OpenAI, and a track record of shipping full-stack projects independently and in teams. Combines a strong C++/Python foundation with practical product thinking, developed through building CareerConnecting (a job-matching app) and Chotu (a multi-model AI study assistant). Open to internships, jobs, and freelance work.

EXPERIENCE

AI-ML Intern — Nova Techset Ltd. *Jun 2026 – 15 Aug 2026*

Full-time · On-site · Pune District, Maharashtra, India

- Worked hands-on with Python and Deep Learning on applied AI/ML projects in a production environment.
- Built and queried PostgreSQL-backed data workflows supporting AI features.

Campus Ambassador — E-Cell, IIT Bombay *Jun 2026 – Nov 2026*

Internship · Remote

- Represented E-Cell IIT Bombay on campus, promoting entrepreneurship and innovation programs (e.g. Illuminate) to fellow students.
- Selected as part of a national student network fostering leadership and startup awareness among engineering students.

LEADERSHIP & COMMUNITY

Main Coordinator, Dishayam 2026 — DES Pune University Innovation & Startup Association (DISA) *Mar 2026*

- Led planning and execution of a Proof-of-Concept showcase and a startup Ideathon at NAV-Unmesh 2026, coordinating a 7-person team.
- Volunteered on the marketing team, promoting the tech fest across colleges both online and offline.

Technical Coordinator, Euraka 2026 — DES Pune University *27 Aug 2026*

- Coordinated with judges — inviting and hosting them — for the event.
- Managed the entire technical execution of the event and assigned work across the team.
- Worked through multiple late-night and full-day sessions to deliver the event.

Hackathon Participant — "VibraRelief Duo" — Navonmesh 2026 · 24-hour National Hackathon, MES IMCC Pune *2026*

- Prototyped a non-invasive wearable for migraine relief using targeted vibration therapy and gentle electronic stimulation, as part of Team ShiftHappens404.
- Attended 30+ hackathons; cleared round 1 of the Smart India Hackathon (SIH).

Student Mentor — Python & Canva Workshops — DES New English Medium School, with DES Pune University *Ongoing*

- Taught Python basics, matplotlib data visualization, and Gen AI/Canva fundamentals to 9th-grade students — 120+ students across 40+ hours of volunteer sessions, and continuing.

EDUCATION

B.Tech, Computer Science Engineering — DES Pune University *Aug 2024 – Aug 2028*

12th Grade — City International School *2022 – 2024*

10th Grade — Sankriti School *2018 – 2022*

PROJECTS

CareerConnecting (JobSwipe) — C++, QML *Jan 2025 – Present*

- Built a swipe-based job-matching app for students and jobseekers with smart job suggestions, resume upload, XP tracking, and AI-guided career paths.

Chotu — Multi-Model AI Academic Assistant — Python, Flask/FastAPI, AI agents *Mar 2026 – Present*

- Built a multi-model personal study assistant with focus sessions, distraction tracking, an analytics dashboard, and a resume-building tool.
- Code: github.com/shahvannsh/Chotu

DocParserEnvs — Python, Gymnasium (Reinforcement Learning), Ollama (Qwen) *Feb 2026 – Apr 2026*

- Built an RL environment where an agent learns to navigate a mock file system to answer technical documentation queries, simulating a developer's search workflow, powered by a local Ollama Qwen model.
- Code: github.com/shahvannsh/RL-Documentation-Parser

Mini-Project Series — Python, JavaScript, REST APIs *2026*

- Real-Time Weather Dashboard — desktop GUI app using the OpenWeatherMap API with JSON parsing and error handling.
- Interactive Pokédex — fetches and renders Pokémon data from PokeAPI with search by name/ID.
- GUI Stopwatch & Alarm Clock — Python desktop utilities with real-time state management and audio triggers.
- Real-Time Digital Clock — JavaScript app using DOM manipulation and interval-based time sync.

SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, HTML, CSS, SQL

Databases: MySQL, PostgreSQL, MongoDB, Microsoft Access

AI/ML & Data: Pandas, NumPy, Matplotlib, OpenCV, Anaconda, Generative AI tooling

Tools & Platforms: Git, Visual Studio, Replit, IntelliJ IDEA, Gamma, Linux, Windows, MacOS

Competitive Coding: HackerRank, LeetCode, CodeChef

Currently Learning: Big Data, Large Language Models (LLMs)

Spoken Languages: English, Hindi, Marathi, Gujarati, German, Japanese, Sanskrit

CERTIFICATIONS (16)

- **AWS:** AWS Artificial Intelligence Practitioner Learning Plan; Machine Learning Learning Plan; No-code Machine Learning and Generative AI on AWS; Amazon Q Developer Getting Started
- **AWS:** Generative AI Learning Plan for EU Governments; Data Engineering for Generative AI Applications; Fundamentals of Generative AI; Generative AI Atlas — Fundamentals and Core Concepts
- **AWS:** AI-Driven Development Lifecycle Knowledge Badge Assessment; Building Production-Ready AI Agents with Amazon Bedrock AgentCore; Generative AI Atlas — Production and Adoption Frameworks
- **AWS:** Public Sector Generative AI Learning Plan, including Generative AI for Executives and Building Generative AI Applications Using Amazon Bedrock
- **Google Cloud:** Introduction to Generative AI; Introduction to Responsible AI
- **OpenAI:** Accelerate Your Learning with ChatGPT
- **SoloLearn:** Introduction to C

In Progress: AWS modules — Foundations of Prompt Engineering, Amazon SageMaker JumpStart Foundations, Customizing and Evaluating LLMs Using SageMaker JumpStart
